

Inventory of Pre-Owned Monoplace Chamber Systems

General Comments to Availability Notice Pages

S. D. Reimers, December 3, 2025

1. We have added a new way of communicating our ranking the estimated values of the chambers we are offering. It is shown in the right-hand column of the page for most manufacturers under the heading of **“Cost per year or remaining window life”**. Those figures are based on dividing the chamber price listed by the number of years remaining in the PVHO-2 rated 20-year window life after subtracting from the listed price an estimated salvage value of 5% of new chamber price. For the chambers that we wish to draw attention to in this regard, the corresponding cell in the column titled **cost per year of remaining window life** is shown with a light blue fill color.
2. Other chambers may also be excellent values under certain circumstances. One such circumstance is start-up situations where initial cost is the dominant concern and third-party financing is difficult. See items 568-11A and 568-12A on the ETC page. Once a facility is operating and profitable for 2 to 3 years, third party financing options make higher acquisition costs much easier. Many of the chambers that are offered with only a few years' rated window life remaining are also offered with a pre-packaged option for re-windowing the chamber when required. This approach can result in some stunningly low values for cost per year of useful window life. Re-windowing services are offered for all ETC, Sechirst, PAHI and Marine Dynamics chambers.
